

VAIBHAV YADAV

Associate Product Implementation Consultant · AI Engineer

PROFESSIONAL SUMMARY

AI Engineer with experience developing intelligent applications using Python, FastAPI, Large Language Models (LLMs), REST APIs, and AI-assisted development tools. Skilled in building AI-powered automation systems, backend services, prompt engineering, workflow orchestration, and enterprise data solutions. Experienced in designing scalable applications integrating AI, analytics, and business processes to improve operational efficiency and decision-making.

PROFESSIONAL EXPERIENCE

Associate Product Implementation Consultant | EngiNeo Solutions | Aug 2025 – Present

- Developed Python-based automation solutions to streamline implementation and reporting workflows.
- Built Python backend utilities and automation workflows for data validation, migration, and business process automation.
- Developed SQL queries and reporting solutions supporting enterprise HR and Finance applications.
- Developed Power BI dashboards and data pipelines supporting enterprise business intelligence solutions.
- Applied AI-assisted development and prompt engineering to accelerate solution delivery.
- Collaborated with business and technical teams to design scalable automation and AI-assisted solutions.

PROJECTS

AI-Powered HRMS Platform

Tools: Python | FastAPI | SQLite | JavaScript | REST APIs | MCP

- Architected and developed a modular HRMS platform supporting employee management, attendance, leave management, authentication, and workflow automation.
- Developed RESTful APIs using FastAPI following modular backend architecture and clean API design principles.
- Integrated MCP workflows with Notion, Linear, and Atlassian to automate onboarding and HR task management.
- Designed role-based authentication, approval workflows, and employee self-service modules.
- Implemented AI-assisted workflow automation to improve HR operational efficiency.

Autonomous AI Trading System

Tools: Python | Multi-Agent AI | REST APIs | Prompt Engineering

- Designed a modular multi-agent architecture for market analysis and AI-assisted trading decisions.
- Designed specialized AI agents for market intelligence, risk analysis, execution, portfolio monitoring, and decision support.

- Implemented prompt orchestration techniques for structured reasoning and autonomous decision support.
- Designed an extensible multi-agent architecture capable of integrating real-time market APIs & decision pipelines.

AI Document Intelligence System

Tools: Python | OpenCV | Faster R-CNN | EasyOCR

- Developed an intelligent document processing pipeline for automated document detection and OCR.
- Implemented Faster R-CNN for document localization and EasyOCR for text extraction.
- Automated preprocessing and structured information extraction from scanned documents.
- Improved document processing efficiency through AI-powered automation.

Enterprise Business Intelligence Dashboard

Tools: Power BI | SQL | Python | DAX | Power Query | SharePoint | Business Central

- Developed executive dashboards for enterprise reporting across HR, Finance, and Hospitality domains.
- Built ETL workflows and optimized analytical data models using Power Query and DAX.
- Automated reporting pipelines, significantly reducing manual reporting effort.

SKILLS SUMMARY

- **Programming:** Python, SQL
- **AI & GenAI:** Large Language Models (LLMs), Prompt Engineering, AI Agents, Multi-Agent Systems, MCP (Model Context Protocol), AI Workflow Automation
- **LLM Frameworks:** LangChain, LangGraph
- **AI APIs:** OpenAI API, Anthropic API
- **Data & Analytics:** Power BI, DAX, Power Query, Pandas, NumPy, Excel
- **Tools & Platforms:** Git, VS Code, Jupyter Notebook, Google Cloud (BigQuery), Claude AI
- **Core Concepts:** API Development, Workflow Orchestration, Data Modeling, ETL, Object-Oriented Programming

EDUCATION

- **Bachelor of Technology (Electrical Engineering) | CGPA: 7.2**

Meerut Institute of Engineering and Technology, Meerut (UP) | 2021–2025

ACHIEVEMENTS AND CERTIFICATIONS

- Google Cloud Data Analytics
- Microsoft Career Essentials in Data Analysis
- Claude AI – Prompt Engineering
- Market Analysis Framework – UniAthena
